# COLLABORATION

Simple Supplier Collaboration (SSC) for Baan focuses and streamlines the power of your Baan system's supply chain logistics by creating a real-time Internet bridge between purchasing agents and suppliers. SSC for Baan is cost-effective and easy to implement and requires no more from suppliers than a PC and Internet access.

## SIMPLE SUPPLIER COLLABORATION FOR BAAN

**A collaborative approach to managing suppliers really works. SSC for Baan provides these valuable benefits:**

**Real-time integration.** Users and suppliers are always working from the same Baan PO data, eliminating needless faxes, phone calls and email.

**Interactive.** System users and suppliers can quickly and accurately communicate changes to delivery dates and quantities, improving suppliers' performance.

**Exception management.** New PO's, Cancelled PO's, and Changes to PO's are separated into dedicated web pages and color-coded to flag them.

**Secure, vendor access.** Providing your suppliers with access to PO details builds relationships and prevents misunderstanding.

**Customizable.** SSC for Baan is easily customized. Both the suppliers' Internet interface and the parameter-based Baan triggering logic can be tailored to ensure complete compliance with your business needs. The suppliers' web interface can be modified to reflect your logo and corporate color scheme.

**Simplicity.** SSC for Baan is easy to implement, and easy to learn for Baan users and suppliers.

IMPROVE PRODUCTIVITY · SIMPLIFY LOGISTICS · ELIMINATE CONFUSION  
Simple Supplier Collaboration for Baan

Supplier management and purchasing are the lifeblood of manufacturing operations. Typically 40-60% of purchasing agents' efforts with suppliers is spent synchronizing delivery dates/ quantities with changing production schedules. This effort can result in confusion, lost productivity and needless expense.

Put a decade of Baan experience to work for you.

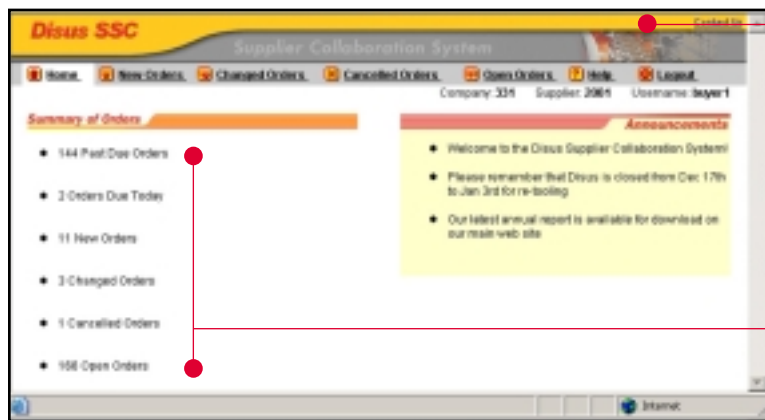

## BUSINESS CASE

Baan supply chain logistics can generate zero value transaction overhead when PO's must be changed to synchronize with shifting production schedules. SSC for Baan harnesses powerful Baan PO data and processes and manages them by exception, freeing up users and suppliers to focus on changes to scheduling and delivery.

SSC for Baan streamlines the supply chain process, including multi-company setups; saving time and money by eliminating unproductive effort while building a collaborative relationship with suppliers.

SSC for Baan is a powerful add-on that makes no additional demands on your system and requires little investment in time or money to implement. You can have it up and running in a day or two; training users and suppliers is easy; and suppliers only need a PC and Internet access to participate in the collaborative process. SSC for Baan quickly pays for itself.

## FEATURES

SSC for Baan extends the reach and adds value to Baan supply chain logistics data and processes:

- Handles all PO-related items – manufactured, sub-contracted, service, purchase and cost items
- Handles re-scheduling messaging generated by MRP, PRP systems and from Baan Production Planning (sub-contracted operations)
- Works equally well in single and multi-company Baan setups
- Requires no changes to the existing Baan business model
- Notifies both parties of order changes. PO details are presented to suppliers as multiple (New/Changed/Cancelled/Open) web pages. Buyers manage suppliers' deliveries through a consolidated Baan PO Detail screen, in schedule format
- Color-coding in the web interface alerts suppliers to 'date' and 'non-date' changes
- Easily exports data to MS Excel
- Supplier fields allow vendors to use their internal order numbers to coordinate orders
- Error messaging alerts users whenever updates fail, e.g. a lost Internet connection
- Sorts by single and multiple keys
- Links to corporate web sites
- Links to corporate email, by buyer
- Easy to use – 20 minutes training per supplier
- No IT requirements for suppliers, only a PC and Internet access

## ARCHITECTURE

The Simple Supplier Collaboration configuration consists of a thin Web App client, which resides on the Baan user's web site and communicates securely through the network firewall with the Disus Transaction Adapter and with the SSC Application. The SSC Application applies incoming queries/updates to the Baan system and relays outgoing queries/updates to the web site. Only one database exists – your existing Baan database.

## ABOUT DISUS

Disus is a full-service software engineering practice with more than 20 years of IT experience – a decade of that with Baan. We're post-implementation specialists; supporting and developing solutions for companies that have already implemented Baan and are now focused on keeping their system in sync with their business, with organizational changes and with changing technology. From low-level technical issues to high-level strategic issues, we know how to support and enhance operational Baan systems without disrupting business.

Disus has customers across North America and the U.K., predominantly in the manufacturing sector.
